

Generalized vegetation/ land cover types in the Santa Monica Mountains CWPP Area

Map by NPS- SAMO Fire GIS, 6/25/2010

Scale 1:125,000 1 inch = 2 miles

All data by NPS- SAMO. Vegetation classification by interpretation of air photos flown 7/2001, with extensive ground-based validation by NPS 2002- 2005. Classes shown here are a highly generalized visualization of the data set. For more detailed information about NPS vegetation mapping methods and products, see this report's reference section.
